Summary

Results-driven Analytics Leader with 9+ years of experience in E-commerce, specializing in translating complex business objectives into actionable analytical roadmaps. Proven expertise in leading high-performing teams, designing rigorous product and growth experiments (A/B testing), and decoding user behavior through advanced cohort and funnel analyses. Currently leading the Loyalty Program Analytics Charter at Flipkart, partnering with Business and Product teams to solve complex business problems and build "single source of truth" data models that drive strategic product and marketing decisions.

Technical Skills

Programming Python, SQL, Spark SQL, Hadoop, Pandas, NumPy, ETL/ELT Pipelines

Machine Learning Forecasting, A/B Testing, Predictive Modeling, XGBoost, Random Forest, Clustering, GenAI/LLMs (Claude, GPT, Gemini, Cursor)

Data & BI Tableau, Microsoft Azure, MLOps, GLMNet, CatBoost, Scikit-learn, TensorFlow, Keras

Professional Experience

Jan 2025 – Present **Lead Business Analyst (Data Science)**, *Flipkart*, Bangalore

- **Strategic Workstreams & Alignment:** Translated ambiguous business priorities into structured analytical workstreams for the Plus Rehash; drove cross-functional alignment across Business, Finance, and Product to build the 2025/2026 AOP, leading to a 10% savings in Supercoins cost by optimizing various earn constructs.
- **Executive Reporting & Insights:** Lead Weekly Business Reviews (WBRs) with the VP of Loyalty and senior leadership, leveraging Claude artifacts to deliver AI-generated insights and guide high-level business and product strategies.
- **GenAI Integration & Automation:** Reduced Root Cause Analysis (RCA) turnaround time by 50% by developing custom Claude skills widely adopted across the Loyalty pod, including automated SQL query generators, RCA frameworks, and WBR insight generators.
- **Product Analytics & RCA:** Instrumented end-to-end metrics, led A/B testing, and presented results in leadership reviews for the Netflix partnership project; solved for enrollment and activation drops via deep-dive RCA, leading to a 50 bps increase in month-end activations.
- **Predictive Modeling:** Developing a conversion model to drive adoptions for the 'Black' paid subscription program, utilizing techniques to handle highly imbalanced datasets.
- **Strategic Decision Making:** Strategized and solved for the instant credit of Supercoins, proving an incremental conversion uplift of 10 bps (feature currently in A/B testing).
- **User Segmentation & Cohort Analysis:** Conducted deep-dive analysis on user behavior, profiling target cohorts (e.g., MPC 12) and analyzing customer funnel transitions (MPC 8 to 6 vs 10) to identify key retention drivers.
- **Team Leadership & Coaching:** Managed a team of 3 analysts, providing clear direction on methodology, structure, and business relevance; created the "Loyalty Handbook" to scale collective intelligence and ensure repeatable, high-quality outputs.

2021 – 2024 **Senior Business Analyst - Customer Analytics**, *Flipkart*, Bangalore

- **Growth & Product Experimentation:** Designed and evaluated rigorous product growth experiments (A/B testing and uplift modeling) for Customer Journey Gamification, consistently moving core metrics to achieve an annual GMV uplift of INR 550 Cr.
- **Churn Reduction & User Behavior:** Designed and implemented predictive customer churn models, successfully decoding user behavior to identify at-risk users and retain 100K+ Long-Term Purchasing Customers (LTPC) monthly.
- **Performance Marketing Optimization:** Led analytics for major Performance Marketing campaigns, developing marketing attribution (MTA) and classification models to optimize Customer Acquisition Cost (CAC) below INR 250, driving 300K incremental customers monthly.
- **Pricing Strategy:** Partnered directly with the CFO Office to optimize pricing strategies, increasing the Alpha Portfolio contribution margin by 20%.
- **Predictive Modeling:** Built a Gross Units Prediction Model achieving 70% accuracy across all customer cohorts.
- **Recognition:** Awarded Aha Innovation Award (Q2 2022, Q3 2023) and BBD Spot Award (2022) for exceptional analytical contributions.

2021 – 2021 **Senior Data Scientist**, *Landmark Group*, Bangalore

- **Retail Consolidation Solution:** Leverage Analytics to support full price product sale using store consolidation, a store to store inventory transfer algorithm, leading to yearly increments of AED 15M.
- **Retail Markdown Recommendation Solution:** Provide stakeholders with accurate forecasts (univariate analysis) and markdown recommendations for fast fashion products using ML/Analytics and statistics.

2018 – 2021 **Data Scientist**, *Impact Analytics*, Bangalore

- **Promo Smart Tool (Wholesale Club - Fortune 500):** Performed data mining, cleaning, manipulation of POS data to recommend a new promo structure to maximize profits using Predictive analytics. Handled data preprocessing using Google Big query + R for the same. GMLnet() models were used to find the promo co-efficients.
- **Coupon Analytics (Craft Retailer):** Customer segmentation using K-means algorithm. Ran Test n Control experiments and analysed meaningful insights. Incremental increase of 8%-10% in margin.

Education

2026 **Post Graduate Diploma in Management (PGDM)**, *Management Development Institute (MDI)*, Gurugram

2016 **B.Tech in Aeronautical Engineering**, *Manipal Institute of Technology*, Manipal
CGPA: 7.7

Certifications

Analytics Tableau Specialist Certification | Udacity Data Analyst Nanodegree

Data Science Microsoft Certified Azure Data Scientist Associate | Applied Machine Learning in Python (Coursera)
