About RedBus:

Makemytrip (India) Pvt Ltd –(**redBus Business**) is India's largest online bus ticketing platform operating across India, SEA & LATAM (Part of GO-MMT group, Nasdaq: MMYT). We have the largest network of bus operators and satisfied customers booking upto 250,000 transactions a day through mobile and desktop channels. With over 400,000+ live routes in multiple continents we host the largest inventory of bus seats from private bus operators and state road transport corporations. We are a true Indian MNC with global presence and operations across India, Singapore, Malaysia, Indonesia, Vietnam, Cambodia Peru and Colombia. In India, redBus works with 6300 + bus operators with services across 50,000 + routes and a customer base of more than 10 million.

redBus at its heart is about people. As the pioneer in our space, we are passionate about creating amazing experiences for passengers, partners and our people. Energized by a great work environment, where talent is nurtured, innovation is celebrated and challenges are conquered, we journey towards creating fulfilling moments for everyone whose lives we touch. Always striking a balance between getting the job done, while also having fun along the way. So here is to being a Great Place to Work!

At redBus our work fundamentally transforms the way people experience road journeys. Our focus has remained to make road transportation more efficient and reliable through technology innovation and winning partnerships with all ecosystem players thereby delivering solutions that truly enrich the lives of our customers and partners. When it comes to intercity travel by road, we are the most important, the most valuable and the most celebrated business in India with millions of customers and thousands of business owners counting on us. It is a privilege to work on extending this globally by making our products work in other markets and to impact even more people. Today, as we think beyond bus journeys we are guided by our vision to be innovative and stay true to our heritage of creating value for all players by targeting unsolved problems.

Key Responsibilities:

We are looking for **Lead - Marketing Analytics & Insights** to turn **data insights into actionable growth decisions**, **leveraging AI in a deep way**. This role will work closely with **Brand, CLM, Data Science, and other teams** to identify opportunities, challenge assumptions, and drive efficient growth using **Analytics and AI**.

This is not a reporting role—the focus is on answering:

"What should we do differently to grow better?"

Roles & Responsibilities

- Own high-impact problem statements to identify growth and efficiency opportunities across **new and existing users**
- Drive **repeat usage and retention**, contributing to CLM strategy and campaigns.
- Identify **new segments & cohorts** for growth, across geographies & LOBs
- Take up opportunity sizing for all our LoBs
- Apply **data- and AI-driven thinking** to identify new growth levers.
- Analyze and optimize **marketing spend**, including email and communication channels.
- Build **unified customer profiles** to understand behavior across product lines.
- Map customer journeys for **cross-sell opportunities** and recommend optimal timing for communications.
- Decompose repeat rates to identify high-performing and underperforming segments.
- Leverage **NPS and other feedback** to predict churn and improve customer engagement.
- Move from generic forecasts to **cohort-level predictions** to guide marketing, inventory, and communication strategies.

- Provide deep consumer and journey insights to support **cross-business initiatives** (Bus × Hotel × Rail).

Educational Qualification:	BE/B Tech/Bachelor in Maths/Bachelor in Mathematics/MA Economics/ MBA
Years of Experience (Minimum & Maximum)	8-10 years

What is the nature and scope of responsibilities the candidate should have handled?

- 8-10 years of experience in **marketing analytics, growth analytics, quantitative consumer research or consulting**
- Strong **problem-solving and strategic thinking** skills.
- Hands-on experience with **analytics, AI/ML frameworks, and consumer insights**.
- Proven ability to **translate data into business decisions**.
- Comfortable challenging assumptions and driving change in a fast-paced environment.
- Strong communication and stakeholder management skills.
